

Eco-Gel™ Training

Through our training program, FireRein will ensure that your emergency response personnel are trained and certified on the use of Eco-Gel™.

FireRein's certified trainers will deliver theoretical and practical (hands-on) modules designed to provide comprehensive training on the use of Eco-Gel™ for both Class A and Class B scenarios.

Our training programs consist of:

1. *Eco-Gel™ Basics* - what it is, how it works, basic Class A and Class B application - 4 hours
2. *Eco-Gel™ Application Equipment* - equipment-specific training to your specific needs - 4 hours
3. *Eco-Gel™ Class A Tactics (Coming Soon)* - structural firefighting tactics to make optimal use of Eco-Gel™ - 8 hours
4. *Compartment Fire Behaviour Basics (Coming Soon)* - the behaviour of fire, smoke and hot gases in a closed compartment – 4 hours¹

¹Requires the acquisition or construction of a small burn prop

Custom training programs are also available to meet your company's specific emergency readiness and training needs.
